

Sub 1:45

Half Marathon Plan

The 13-week plan that took Coach Tyler's girlfriend from casual runner to a 1:42 half marathon finish — running 7:50 average pace for 13.1 miles.

1:42	7:50	13	7:55
FINISH TIME	AVG PACE/MI	WEEK PROGRAM	TARGET PACE/MI

WHO THIS IS FOR

Built for competitive runners chasing a real time goal.

This plan is for runners who've completed a half marathon and want to go faster — specifically under 1:45. It combines interval work, tempo runs, and race-pace sessions that progressively build your ability to sustain 7:55–8:00 mile pace for 13.1 miles.

It's not a beginner plan. If you're new to running, start with the Beginner Half Marathon plan first. If you've got the base and you're ready to race, this is your plan.

— Running base required

Comfortable running 15–20 miles per week. You should be able to run 8–9 miles at easy pace before starting.

— Time commitment

5–6 days per week. Includes interval work, tempo runs, long runs, and strength sessions.

— Half Marathon Goal Pace (HMGP)

7:55–8:00 per mile. This is the pace referenced throughout the plan as HMGP.

— Key benchmarks

5 miles @ 8:00–8:05 feeling controlled. 3x2 miles at HMGP with 2 min rest. 12–13 mile long run at easy pace.

THE STRUCTURE

How the 13 weeks are built.

WEEKS 1–4

Speed Foundation

Interval work at 10k pace and below. Race pace introductions. Building the engine that makes 7:55 feel sustainable.

WEEKS 5–8

Tempo & Race Pace

Longer tempo efforts. Mile repeats at race pace. Long runs building to 12–15 miles.

WEEKS 9–11

Peak Phase

Race day simulation runs. Key workouts at HMGP. Highest volume of the plan.

WEEKS 12–13

Taper

Volume drops. Sharpening runs only. Legs freshen. Race day arrives.

Breathe.

A NOTE FROM COACH TYLER

Sub 1:45 is not a ceiling. It's a doorway.

This plan was built for someone who had never seriously chased a time goal before. She followed it without shortcuts, hit every workout, and crossed the finish line at 1:42 — 7:50 average pace for 13.1 miles.

The difference between 'finishing a half marathon' and 'racing a half marathon' is structure. Knowing exactly what pace to run and why. Building the confidence week by week until race day feels like the easiest run you've done in months.

If you want that built specifically around your fitness level, your schedule, and your race — that's what 1-on-1 coaching is for.
