APPROACH

WHO THIS IS FOR

Built for beginners. Built to last.

This plan is for people who are new to structured training or returning after a break. Three workouts per week, each under 30 minutes. You will learn the movements, build consistency, and come out the other side stronger and more confident.

You don't need to be in shape to start. You need to start to get in shape.

— Time commitment

3 workouts per week, ~30 minutes each. Non-negotiable rest days built in.

— Equipment

Dumbbells and a sturdy surface — chair or bench. No barbell required.

— Progression

Weeks 1–2 build the foundation. Weeks 3–4 progress the movements and add challenge.

— Key focus

Quality over quantity. Good form beats more reps every single time.

THE STRUCTURE

How the program is built.

WEEKS 1-2

Foundation

Learn proper form. Build consistency. Focus on controlled movements and body awareness.

WEEKS 3-4

Progression

Add resistance or reps. Shorten rest. Improve movement efficiency and build real strength.

Universal Warm-Up

Perform before every workout — 3–5 minutes. Each movement 20–30 seconds.

MOVEMENT	TARGET
Arm Swings (forward/back + across)	Shoulders, chest
Torso Twists	Spine, core
Leg Swings (front-back + side-side)	Hips, hamstrings
Hip Openers — World's Greatest Stretch	Hips, glutes, hip flexors
Bodyweight Squats (slow tempo)	Quads, glutes, core
Glute Bridges	Glutes, hamstrings
Inchworms to Plank	Hamstrings, shoulders, core

Universal Cool-Down

Perform after every workout — 3–5 minutes. Hold each stretch 20–30 seconds.

MOVEMENT	TARGET
Standing Quad Stretch	Quads, hip flexors
Chest Wall Stretch	Chest, shoulders
Cross-Body Shoulder Stretch	Rear delts, upper back
Seated Hamstring Stretch	Hamstrings, calves
Child's Pose or Supine Spinal Twist	Lower back, spine

Weeks 1 & 2 — Foundation Phase

Learn the movements. Build the habit. Focus on form over weight.

Workout A — Full Body Strength

Tip: Focus on slow eccentrics and strong lockouts. Prioritize form on every rep.

EXERCISE	SETS & REPS	GOAL
Goblet Squats	3x10–12	Build lower-body strength and balance. Keep chest tall, knees tracking over toes.
Incline Push-Ups	3x8–12	Strengthen upper body with a scaled push-up. Elbows at 45 degrees.
DB Bent-Over Rows	3x8–10/arm	Improve posture and pulling strength. Flat back, pull with elbow not hand.
Plank	3x20–30 sec	Build core endurance. Hips level, squeeze everything.

Workout B — Lower Body & Core

Tip: Keep upright posture. Engage core throughout every movement.

EXERCISE	SETS & REPS	GOAL
Step-Ups (DB optional)	3x8–10/leg	Improve single-leg strength and balance. Drive through the heel.
Glute Bridges	3x12–15	Activate glutes and strengthen posterior chain. Squeeze at the top.
Russian Twists	3x20 total	Build rotational core strength. Control the rotation — no bouncing.
Side Plank	3x15–20 sec/side	Strengthen lateral core stability. Stack feet or stagger for balance.

Workout C — Upper Body & Cardio

Tip: Control every rep. No momentum. Feel the muscle working.

EXERCISE	SETS & REPS	GOAL
DB Shoulder Press	3x8–12	Build overhead strength. Core tight, no arch in lower back.
DB Bicep Curls	3x10–12	Strengthen arms. Full range, slow eccentric.
Tricep Dips	3x8–12	Improve arm endurance. Elbows back, control the dip.
Jump Squats	3x12	Boost cardio and leg power. Land soft, absorb through the legs.

Weeks 3 & 4 — Progression Phase

Add resistance or reps. Shorten rest. Movements become more challenging.

Workout A — Full Body Strength (Progressed)

Tip: Same structure as weeks 1–2. Heavier weight, harder variations.

EXERCISE	SETS & REPS	GOAL
Step-Back Lunges	3x10/leg	Introduce unilateral strength and coordination. Keep torso upright.
Regular Push-Ups	3x10–12	Increase difficulty from incline. Tight core, full range.
DB One-Arm Row	3x8–10/arm	Focus on unilateral strength. Brace the core throughout.
Plank with Shoulder Taps	3x20 (10/side)	Add dynamic stability to the plank. Minimize hip rotation.

Workout B — Lower Body & Core (Progressed)

Tip: Increase range of motion and single-leg control.

EXERCISE	SETS & REPS	GOAL
----------	-------------	------

DB Bulgarian Split Squats	3x8/leg	Increase range of motion. Keep front knee tracking over toes.
Single-Leg Glute Bridges	3x10/leg	Isolate and strengthen each side. Drive through the heel.
Hanging or Bench Knee Raises	3x12-15	Activate lower abs. Control the movement — no swinging.
Side Plank with Reach-Through	3x12/side	Dynamic lateral core challenge. Stay stable through the hips.

Workout C — Upper Body & Cardio (Progressed)

Tip: Challenge shoulder strength and arm endurance.

EXERCISE	SETS & REPS	GOAL
DB Arnold Press	3x8-12	Challenge shoulder strength through full rotation. Slow and controlled.
Hammer Curls	3x10-12	Focus on forearms and biceps. Neutral grip, no swinging.
Close-Grip Push-Ups	3x10-12	Advanced tricep strength. Elbows tight to the body.
Jump Rope or High Knees	3x30 sec	Dynamic cardio for endurance. Stay light on your feet.

A NOTE FROM COACH TYLER

Every strong athlete started exactly where you are.

This plan isn't complicated because it doesn't need to be. Consistency beats complexity every time. Show up three times a week, move with intention, and trust the process.

By the end of week 4 you'll be stronger than when you started. More importantly, you'll have built the habit. That habit is worth more than any single workout.

When you're ready for more — the Intermediate and Advanced programs are waiting.
